

BALAJI SRINIVASAN

Software Developer | Full-Stack(React.js&Node.js) | DSA Problem Solver

Salem, India • 8248961041 • balajisrinivasan129@gmail.com • linkedin.com/in/Balaji-Srinivasan129 • github.com/Balaji122005

PROFESSIONAL SUMMARY

Aspiring Software Developer with a strong foundation in Data Structures & Algorithms (200+ problems solved on LeetCode & GeeksforGeeks), full-stack web development using React.js and JavaScript, and object-oriented programming in Java. Hands-on experience building responsive web applications, RESTful API integrations, and database-driven frontends. Skilled in Git-based workflows, agile collaboration, and writing clean, modular code. Passionate about solving real-world problems and continuously expanding technical expertise.

TECHNICAL SKILLS

Languages	Java, JavaScript (ES6+), C, C++
Frontend Development	React.js, HTML5, CSS3
Backend Development	Node.js (Basics)
Database	Firebase
DSA	Arrays, Strings, Hashing, Linked Lists, Stacks, Queues, Trees, Sorting, Binary Search, Recursion, Big-O Analysis
Tools	Git, GitHub, VS Code, Figma, Canva
CS	Object-Oriented Programming (OOP),Computer Networks

PROJECTS

TNverse-InteractiveTourism Platform(Full-Stack)	Personal Project	Mar 2025 – Jul 2025
- Built a full-stack tourism web application using React.js with component-based architecture, state management (useState/useEffect), and responsive CSS Grid/Flexbox layouts. - Implemented location-based suggestion engine and user review feature using JavaScript filtering and hash-map based search logic for fast data lookups. - Managed codebase with Git — feature branching, commits, and pull requests; structured code into modular, reusable React components following clean code principles.		
Hospital Management Website (Frontend)	Academic Project	Jun 2024 – Dec 2024
- Developed a responsive React.js dashboard with real-time patient data display, applying component lifecycle methods and conditional rendering for dynamic UI updates. - Implemented a location-based hospital finder with map integration and keyword search using geolocation API and binary search logic for efficient filtering.		
IoTMiniProjects(LaserAlarm& SmartPetFeeder)	Academic Projects	Jan 2024 – Feb 2024
Built a laser intrusion alarm with sensor trigger logic and mobile push notifications; developed a smart IoT pet feeder with remote-control via mobile application.		

INTERNSHIPS

Web Development Intern	Codsoft	2024
Developed responsive frontend projects with HTML5, CSS3, and JavaScript; applied component structure and collaborated via Git version control and pull request workflows.		2024
Java Development Intern	Codsoft	2024
Built OOP-based Java applications with modular design, data structure usage, and clean, well-documented code demonstrating strong programming fundamentals.		2024
IoT & Embedded Systems Intern	Ancit Consultancy	
Integrated hardware sensors with software logic for real-time monitoring; applied event-driven programming concepts to embedded system workflows.		

EDUCATION

B.IT – Bachelor of Information Technology CGPA:		
8.0 / 10	Knowledge Institute of Technology	May 2023 – May 2027
RelevantCoursework:DataStructures&Algorithms,DBMS, Operating Systems, Computer Networks, Object-Oriented Programming, Web Technologies		
Higher Secondary Education (Science Stream)		
80.7%	The Gugai Hr. Sec. School	Completed 2022

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL – Human Computer Interaction (Elite + Silver 88%) - NPTEL – Industry 4.0 & IoT (Elite + Silver 75%) - National Hackathon – BGS Bangalore & KRCE Trichy 2nd Prize – HackXtreme’26,at K. Ramakrishnan College of Engineering, Trichy	200+ DSA problems – LeetCode & GeeksforGeeks (C, Java) 1st Prize – Code War 2.0, Park College of Engineering, Coimbatore 2nd Prize – Google Developer Groups Hackathon, Savitha College of Engineering,Chennai
